

## Universal process controller eCONTROL

- Continuous, 2-point, 3-point and On/Off control
- Ratio control function
- Sensor inputs (4...20 mA, 0...10 V, frequency, Pt100)
- Control of proportional, process and motor valves
- Bürkert proportional valves and flow meters are memorized
- 1/16 DIN size panel version

Type 8611 can be combined with...

**Type 6223**

Proportional Valve

**Type 2301+8696**

Globe control valve system

**Type 8012**

INLINE flowmeter

**Type 8316**

Pressure transmitter  
4...20 mA

**Type TST001**

Resistance thermometer

**Type 8222**

neutrino conductivity meter

Thanks to its compact design, the universal 8611 controller is especially designed for compact control system applications.

It is compatible and tested with all Bürkert proportional valves and sensors and can be connected with every none-Bürkert Control valve by standard signal (4...20 mA, 0...10 V or PWM-output).

The proportional & Integral (PI) process controller is equipped with many additional functions. The process value feedback can be supplied as one of three analog inputs; a standard signal (4...20 mA/0...10V), frequency or Pt100 signal; directly to the universal controller.

The process switching points can be set via a 4...20 mA or 0...10 V signal or with the keypad. For temperature specific control, it is possible to set a cascade structure with both temperature and flow as inputs.

Thanks to the proportional control capabilities, a wide range of control functions can be performed in a variety of liquids and gas medias.

### Fields of application:

- ▶ Flow control, Ratio control
- ▶ Pressure control
- ▶ Temperature control
- ▶ Conductivity control
- ▶ pH control
- ▶ Level control
